DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-67, drawn to arithmetic devices with reconfigure operation paths by outside controls, classified in class 708, subclass 230.
 - II. Claims 68-79, drawn to an arithmetic system with an address generation device for generating address and control signal, classified in class 708, subclass 490.
 - III. Claims 80-97, drawn to an address generation device, classified in class 711, subclass 200.
 - IV. Claims 98-105, drawn to an interleave device, classified in class 711, subclass 127.
 - V. Claims 106-109, drawn to an arithmetic system with a component data storage unit having a plurality of storage means connected in a ring and able to shift the stored data, classified in class 708, subclass 209.
2. Because inventions as set forth above are clearly patentable different and distinct from one to another, and each clearly has a utility by itself, and because the search required for on Group is not required for another Group. The restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
